

TO WHOM IT MAY CONCERN:

We (the Inuits) know it is important to populate more of the Belugas to increased so each settlements of the Nunavik has limited to hunt for belugas.

It is also important for Inuits to have this delicious diet to eat the skin (muktuk) the blubber, (for Avase to be made) and the meat (to make nikkuk) for us Inuits. We just wish we (the Inuits) could have more of the belugas unlimited, hunting close-by in Kuvvaqaaqik.

Thank-you if this is understandable.

Inuits
