Anguvigapik

2020-01-09

Kitty Annanack: omega fat have a good vitamins for humans, we have to have to keep the tradition alive. fisheries and oceans have us where they want us.

Tommy unatwenak: We don't know if they'll say yes to opingivik if ever. They will have to be two (2) observers from here.

Elisah Emudluk Since its winter where do they end up in mid winter?

Kenny Sararuse: There is a cabin in opingivik make it two (2) so there will be such and such like someone looking out for polar bear make some nikkuk and put a freezer there.

Sammy unatwenak: Since the last 33 years things have not add up between us and especially on spending money, and for the next 3 years we will have to crack open some of there dent's. something that will have to benefit us since it's been the opposite for most of the time.

Kellan Labrador hinituk Spring my father shot and killed a polar bear and some belugas. There are calves in summer and they reach ~~the~~ Global warming could affect the species and they could be at risk we have come along way we have to start sharing again.

Lucas Angma Etok: if they can land a plane on the lake observe it before and after landing we use to hunt beluga in opingivik but that was long ago but today is a different story even if the tide is slow there are some belugas, there use to use net's to catch belugas, Kuujuaqmiut, we can't always know when they closed the hunting season

Kortak dont want no more Quotas (beluga)

And about makalik, they said it was going to be closed for two (2) years but it has been 31 years and counting. It's been hard for members of anguvigapik for the last few years, this is our land and we are not going to leave anytime soon. Tasiuag, Kuvjuag, George River will have to convince the the department of fisheries and oceans

upingivik Killinik when is the best time to go hunting beluga near there?

Where and when we can use Air Inuit air plane with ski's appoint someone to check at the ice near Killinik and when to hunt beluga there. Mike Oconner have observe or will observe the outcome of the situation. since they will go on air for the betterment of the outcome.

before ~~3rd~~ ^{may} feb march
two guys

observe the upingivik Killinik Area
each 30 beluga Quotas

We have (20) belugas a year on Quotas

Nuvutmi stop and watch for beluga's

ipigituk have a lot of belugas. Just on the mouth (inlet) will be out on the air in Kuujjuarqik federal government cannot give us a penny for the outcome of the situation. They have a far better time with green peacel. In the pastime they use to take only what's enough for themselves and today we take more than enough and use it for profit. April-May is the time to hunt in opingivik there will be a survey down at opingivik since when is the best time to hunt beluga down there. Tsisiqag-Kuujjuag-G.R will have to hunt together to offset the money spent on hunting at opingivik we have to talk about makalik too with these two community to overcome the situation in makalik since we have been in Quartag for too long now and spent too much money hunting beluga in Quartag. We would have beluga when it is time in or near a fatalit when they are crossing nearby around our area. we were in makalik not too long ago when we saw people hunting beluga for two (2) weeks. mary-J. Annanack. since there is no cabin in opingivik it could be dangerous for people if there is no cabin. ever year Sandy would or went hunting nanook-beluga and such. 2020-2021-2022-2023 How can we go hunting in haleet ~~also~~ since there is nobody going hunting belugas these days we have to revitalize our hunting ways since it have been like that. beluga have been going straight to Quartag and beyond and not coming into Ungava-bay

RE: Reopen MARRALIK RIVER ESTUARY

We Kangiqsualujjuaqmiut want to reopen MARRALIK River for hunting beluga whale For this coming 3 year plan,
REASON; 1, A) It's closer to our community

B) We know the area well and have used it for many years before Traditionally,

C) Less cost on gasoline and food,

D) We can teach our children how to use and prepare the meat, 2, A) The plan we have been using for many years now
is not working

to for us and not supporting us in any way what so ever,

B) Too Costly;

1; (FOOD, GASOLINE, AIR TRANSPORTATION, and RENTALS)

D) Too Dangerousness

1) WIND, LONG DISTANCE, ICE CONDITIONS,

2) NOT TEACHING OUR CHILDREN cause we cannot bring them of long distance,

Thank's
